Questions for IMM Pharmacist

Additional Context / Background

High-Risk Prescribing Check

Real Time Prescription Monitoring

Would you like our pharmacists to review RTPM as part of this service?

○ Yes ○ No

Real Time Prescription Monitoring (RTPM)

Our pharmacists have access to Australia's RTPM system, providing instant visibility of a claimant's complete prescription history for high-risk medications including opioids and benzodiazepines.

Benefits: Identifies medication misuse, doctor shopping, or poly-pharmacy risks
Reveals controlled substance prescriptions across all prescribers nationally
Supports evidence-based risk assessment and liability management
Enables early intervention before medication complications impact RTW outcomes
